

Profiles

In the profiles tab, we can control the profiles assigned to users and determine the permissions they have over the application. We can choose between family management (groups of families that contain other families or permissions) and profile management (groups of families and permissions that are assigned to the user).

Family Management:

A screenshot of a web application window titled 'FormGestionFamilia_327LG'. The main heading is 'Gestión de familias'. The interface is divided into three main sections: 'Familia base:', 'Familia a agregar:', and 'Permisos:'. On the left, there are four buttons: 'Asignar permiso', 'Asignar familia', 'Eliminar familia', and 'Eliminar componente'. The 'Familia base:' section contains a tree view with nodes: 'Usuario' (with sub-nodes 'PermisoUsuario'), 'Bibliotecario' (with sub-nodes 'PermisoMaestro', 'PermisoPrestamo'), 'Usuario' (with sub-nodes 'PermisoUsuario'), and 'Admin' (with sub-nodes 'PermisoAdmin'). The 'Familia a agregar:' section contains a similar tree view with nodes: 'Usuario' (with sub-nodes 'PermisoUsuario'), 'Bibliotecario' (with sub-nodes 'PermisoMaestro', 'PermisoPrestamo'), 'Usuario' (with sub-nodes 'PermisoUsuario'), and 'Admin' (with sub-nodes 'PermisoAdmin'). The 'Permisos:' section contains a list of seven permissions: '1 - PermisoUsuario', '2 - PermisoAdmin', '3 - PermisoMaestro', '4 - PermisoPrestamo', '5 - PermisoReporte', '6 - PermisoReposicion', and '7 - PermisoEncargado'. At the bottom, there is a text box labeled 'Nombre de familia:' and a button labeled 'Agregar familia'.

In this form, we can create different families that contain permissions and families to facilitate permission management.

- Assign Permission: Allows us to assign the selected permission in the "Permissions" list to the family selected in the "Base Family" list.
- Assign Family: Allows us to assign the selected family in the "family to add" list to the family selected in the "Base Family" list.
- Delete Family: Deletes the family selected in the "Base Family" list.
- Delete Component: We will unassign the selected family or permission in the "Base Family" list from the family that contains it.
- Add Family: We must write a "Family Name" in the text box next to it. Once the "Add Family" button is pressed, we will create a new empty family in the system.

note: Once the family is assigned to a profile used by a user, it cannot be modified until no user contains it. Nor can we assign a family or permission that the base family already contains.

Profile Management:

The screenshot shows a web application window titled 'FormGestionPerfiles_327LG'. The main content area is titled 'Gestión de perfiles' and is divided into three main sections: 'Perfiles:', 'Familias:', and 'Permisos:'. On the left side, there are four buttons: 'Asignar permiso', 'Asignar familia', 'Eliminar Perfil', and 'Eliminar componente'. The 'Perfiles:' section contains a tree view with the following structure: 'Bibliotecario' (with sub-items 'PermisoReporte' and 'Bibliotecario'), 'Basico' (with sub-item 'Usuario'), and 'Admin' (with sub-items 'PermisoMaestro', 'PermisoPrestamo', 'PermisoReporte', 'PermisoReposicion', 'PermisoEncargado', 'Usuario', and 'Admin'). The 'Familias:' section contains a tree view with the following structure: 'Usuario' (with sub-item 'PermisoUsuario'), 'Bibliotecario' (with sub-item 'PermisoMaestro'), 'PermisoPrestamo' (with sub-item 'PermisoPrestamo'), 'Usuario' (with sub-item 'PermisoPrestamo'), and 'Admin' (with sub-item 'PermisoAdmin'). The 'Permisos:' section contains a list of permissions: '1 - PermisoUsuario', '2 - PermisoAdmin', '3 - PermisoMaestro', '4 - PermisoPrestamo', '5 - PermisoReporte', '6 - PermisoReposicion', and '7 - PermisoEncargado'. At the bottom, there is a text input field labeled 'Nombre de perfil:' and a button labeled 'Agregar perfil'.

In profile management, we can perform operations very similar to those in family management, but these will be done on the profiles that we will assign to users.

- Assign Permission: Allows us to assign the selected permission in the "Permissions" list to the family selected in the "Profiles" list.
- Assign Family: Allows us to assign the selected family in the "family to add" list to the family selected in the "Profiles" list.
- Delete Profile: Deletes the family selected in the "Profiles" list.
- Delete Component: We will unassign the selected family or permission in the "Profiles" list from the profile that contains it.
- Add Family: We must write a "Profile Name" in the text box next to it. Once the "Add Family" button is pressed, we will create a new profile without permissions in the system.

note: Just as in family management, we cannot assign families or permissions that the profile already contains, whether directly or indirectly.
