In this form, we can select a book to see the number of available copies of it. Once the book is selected, if we press the "**borrow**" button and there are available copies of the selected book, it will be added to the loan request.

Now we return to the original form and must select the client who will request the loan in the grid. If they are not registered, we can press "**register client**" to load them into the database.

- The client cannot be selected for a loan if they already have an active one.
- The client cannot be selected for a loan if they have 3 loaded sanctions.

Finally, once the book to be loaned and the client are selected, we press the **Register Loan** button and the form to collect the loan deposit will open.

The screenshot shows a window titled 'FormCobrarSeña' with a dark teal background. The main heading is 'Cobrar seña'. Below it, there are two input fields: 'Método de pago' with a dropdown menu showing 'Tarjeta' and a small downward arrow, and 'Monto a cobrar' with a text input field. Below these, there are four more input fields: 'Nombre del titular', 'Número de la tarjeta', 'Código de seguridad', and 'Vencimiento'. At the bottom center, there is a light blue button labeled 'Cobrar'.

We complete the payment details and press **Collect**. If they are correct, the bank will accept the payment and the payment and loan will be registered.
