

Request Quotation:

The screenshot shows a Windows application window titled "FormSolicitarCotizacion_327LG". The main title is "Solicitar cotización".

Lista de libros disponibles (Available Books List): A grid showing book details. One row is highlighted in blue.

ISBN	Título	Autor	Editorial	Edición	Disponibles	Prestados
9780001	El Quijote	Miguel de Cervantes	Alfaguara	1	7	0
9780002	Cien Años de Soledad	Gabriel García Márquez	HarperCollins	2	7	0
9780003	1984	George Orwell	Penguin libros	3	7	0
9780004	El Principito	Antoine de Saint-Exupéry	Nova	2	7	0
9780005	Harry Potter y la Piedra Filosofal	J.K. Rowling	Planeta	1	6	0

Below the grid are search fields: ISBN, Título, Autor, Editorial, Edición, and a "Filtrar" button.

Libros seleccionados (Selected Books): A list box where selected books are moved from the available list.

Lista de distribuidores (Distributors List): A grid showing distributor details. One row is highlighted in blue.

CUIT	Empresa	Teléfono	Dirección	Correo
20-45823327-7	Libros.com	011 4356-7543	Av. Libertador 400	libros@gmail.com

Below the grid are search fields: CUIT, Empresa, and a "Filtrar" button.

Distribuidores seleccionados (Selected Distributors): A list box where selected distributors are moved from the available list.

Buttons:

- "Agregar libro a solicitud" (Add book to request) with a right-pointing arrow icon.
- "Quitar libro de la solicitud" (Remove book from request) with a left-pointing arrow icon.
- "Agregar distribuidor a solicitud" (Add distributor to request) with a right-pointing arrow icon.
- "Quitar distribuidor de la solicitud" (Remove distributor from request) with a left-pointing arrow icon.
- "Generar solicitud" (Generate request) at the bottom center.

In the quotation request form, we can register requests to the distributors loaded in the system.

We will have to select the books to add to the request in the "**List of available books**" grid and touch the "**Add book to request**" button. We can also select a book in the "**selected books**" list in the same way and touch the "**remove book from request**" button not to add it to the request.

Then we must do the same with the distributors; we can select more than one distributor and different requests will be generated for each one.

Finally, when we have already selected the distributors and books, we press the "**generate request**" button to load it into the database.
